The following are recommended post-care instructions for patients following the alloClae™ procedure:

- Avoid exposure of the treated area to sun, UV lamp, and extreme temperatures (both hot and cold) for 24-48 hours. Use appropriate sunscreen protection.
- Avoid vigorous physical activity and/or working out for 24-48 hours.
- Avoid submersion of the procedure area for 24-48 hours (hot baths, hot tub, sauna, steam room, etc.).
- If any sterile dressings were used, please note those specific care instructions.
- Worsening or prolonged symptoms or signs of discomfort should be reported to the physician
